摘要 本文介绍激光诱导荧光(LIF)的瞬时浓度场定量测量技术,采用了CCD图象采集处理系统和低浓度简化校正技术等,讨论了喷流混合流浓度场测量的初步结果。

LIF QUANTITATIVE CONCENTRATION FIELD MEASURE-MENT FOR THE MIXING FLOWS OF FREE JETS

北京航空航天大学流体所,100083

Abstract

The instantaneous quantitative measurements of the concentration field using Laser Induced Fluoresence (LIF) technique with a Digital Image (CCD) capture & processing system and the simplified calibration for the free jet mixing flows are presented. Also some digital image process method used for better displaying the flow structures and some preliminary results are discussed.

Key words Laser Induced Fluorescence concentration field digital image processing jet mixing flows measurement calibration
