# Agric. Econ Czech

**F. Střeleček, P  
J. Lososová**

**Economic results  
agricultural companies  
in production areas  
marginal areas  
year 2000**

Agric. Econ. — Czech, 48  
443

The article was written on  
research results concerning  
development of several  
agricultural companies. In

the altitude, the sample was divided into two sub-samples: comparison of production areas and comparison of marginal areas. Various economic indicators were monitored in both sub-samples, the most important being the economic result. Other monitored indicators related to this one — e.g. profit ratio, structure of the result, tax impact on the economic result. Other monitored indicators included structure of the revenue, productivity of labour, labour technical efficiency, capital efficiency and other indicators. Comparison (development in recent years; comparison of production and marginal areas) and space comparison of these indicators in the two samples were carried out.
