Factor analysis of owners equity effectiveness

Agric. Econ. – Czech, 48 (2002): 229-
232

The paper shows methodical procedure and results of factor analysis of owners equity effectiveness in form of quantification and determination of analytical indicators of their pyramidal system. The analysis is realised through comparison of aggregated values of two groups of enterprises (per 30 each group) for the period 1998– 2000. First group of

enterprises is in the first third of soil price groups in Slovakia (cheapest soil) and the second group in the third of price group of the most expensive soil.

Keywords:

owners equity effectiveness, factor analysis, pyramidal decomposition, revenues, costs, capital
