Agric. Econ. – Czech

J. Riegler

Eco-social market economy as an European innovation

Agric. Econ. – Czech, 49 (2003): 101-105

The paper presents fundamental ideas of European social market economy that are to be applied to formulate the “ European Model of Agriculture” . In connection with the needs of further development of the Common Agricultural Policy, food strategy and regional policy, some challenges to the modern and perspective strategy of agriculture and food

production in the EU are formulated. A new European challenge to strengthen the principle of solidarity, sustainability, multi-functionality and subsidiarity is an appreciable point of departure to solve the problems in Czech agriculture.

Keywords:

agriculture, Europe, European model of agriculture, eco-social market economy
