# **Agric. Econ. – Czech**

**J. Klíma, M. Palát**

## **Labour productivity as a factor forming the economic efficiency and competitive ability of the country**

Agric. Econ. – Czech, 49 (2003): 515-519

The paper is focused on the evaluation of labour productivity in industry as a whole and in the selected branches in the Czech Republic in 1997– 2001. The labour productivity index for employees is the ratio of industrial production indices

and indices of the number of employees. Methods of regression and correlation analysis and development trends were applied for the mathematical-statistical analysis.

**Keywords:**

labour productivity, industry, Czech Republic, statistical processing, development trends
