## About NGV Global 2014

### Two Great Conferences—One Location!

***Network with transportation stakeholders from around the globe in Southern California—the epicenter of North America NGV market development for the past 20 years.***

Join us for NGV Global 2014, co-located with ACT Expo 2014—North America's largest alternative fuel and clean vehicle technology show—for the largest gathering of clean transportation stakeholders that North America has ever seen! Fleets, technology companies, OEMs, infrastructure developers, fuel providers, and policymakers will come together in Southern California, May 5-9, 2014, to discuss the rapidly evolving global NGV market.

The North American shale gas revolution has led to a record cost spread between natural gas and petroleum fuel prices, spurring the domestic market to evolve from one traditionally driven by policies, regulatory drivers, and incentives, to one driven by NGV project economics, ROIs, and the corporate bottom line.

Peer-to-peer learning and international networking will be a primary focus of NGV Global 2014. As the abundant North American shale gas supply will inevitably affect other countries around the world in the coming years, the conference sessions will showcase how low-cost, extremely abundant natural gas resources will revolutionize the global transportation system as we now know it. In addition, industry leaders from mature NGV markets—such as Italy, Argentina, India, and China—share key lessons learned as their local markets blossomed.

The exciting week-long program will feature:

- NGV educational sessions:
  - Global case studies from leading public and private fleets
  - The latest OEM and aftermarket technologies
  - Fuel supply, procurement, and infrastructure solutions
  - Emissions reductions and air quality improvement strategies
  - Total cost of ownership and residual values
  - Industry trends and key market drivers in the years ahead
- Off-site technical tours to natural gas fueling and project facilities
- A 150,000 sq. ft. Expo Hall featuring a dedicated global natural gas zone
- A Ride & Drive event with all vehicle weight classes represented
- Hosted networking events and social programming

**Register today to join us for NGV Global 2014!** Want to learn more about why you should be excited that the 2014 conference is taking place in Southern California? [Click here »](#)

NGV Global 2014 is proud to announce the support of the following Endorsing Organizations, all of which are dedicated to expanding the use of natural gas vehicles across the globe.
