

Advances in nanotechnology and microtechnology systems applications

SPIE Microtechnologies

The European meeting where the latest progress in microtechnology and nanotechnology systems and applications were presented with a focus on the areas of smart sensors, cyber-physical systems, bioMEMs, medical devices, and integrated photonics. The most recent advances were shared at the 2017 meeting, in 4 conference topics and 155 presentations.

2017 Conference Technologies

Leading international researchers and scientists shared information covering some of the following topics:

- smart sensors
- cyber-physical systems
- bioMEMs
- quantum communication
- medical devices
- integrated photonics
- hybrid nanosystems
- and many other cutting-edge R&D results

2017: Three days, three world-class plenary presentations

Luca Benini
Univ. degli Studi di Bologna (Italy)

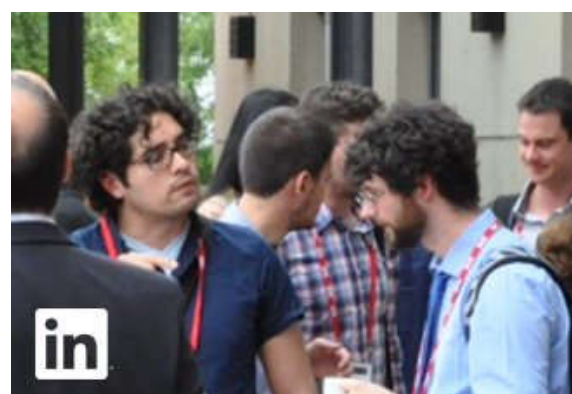

Alfons Dehè
Infineon Technologies AG
(Germany)

Jose A. Garrido
Institut Català de Nanociència
i Nanotecnologia (ICN2) (Spain)
