Virtual instrument and virtual experiment based on LabVIEW

315010

Abstract: Virtual Instrument is a late-model instrument category and full of vitality, which is formed by using the computer technology in the apparatus area. Virtual Instrument System Based on LabVIEW is a practical one. Due to it has the feasibility and superiority, Virtual Instrument and Virtual Lab Based on LabVIEW is a pattern of lab teaching, it can be popularized in both common colleges and long-distance teaching.
