摘要 分析了火电站能量热力系统(锅炉热力系、汽轮机热力系)的能源经济效率(Yong经济效率),并从绿色生态保护角度出发,分析了火电站的生态效率计算模型.以系统绿色Yong经济运行系数入手分析,以发电成本最低为依据,建立了火电站能量系统的绿色Yong经济运行系数的优化表达式.最后以部件优化追加投资效益为研究对象,从而确立了需要改进的部件及其改进所得的综合效益函数.

关键词: 火电站 能量系统 绿色热经济 生态效率 优化分析

Abstract: This paper analyses energy economy efficiency (Yong efficiency) of thermal system of fossil fuel power plants (FFPPs) roundly. At the same time, based on the green zoology protection point, the calculating model of zoology efficiency has been analysed. From System-Green-Yong-Economic-Coefficient, and taking the lowest cost of generate electricity as springboard, this paper establishes the optimization formula of System-Green-Yong-Economic-Coefficient. Taking the benefit of superaddition invest of components as object, components, which need ameliorating, are ascertained. At the same time, the synthetical coefficient function of which are established.

Key words: fossil fuel power plants energy system ecotype heating economy zoology efficiency optimization analysis
