中文摘要:

北方能源生态模式是一项高效的生态农业技术。该技术在山西省已推广近667 hm²(万亩), 经济、能源、生态环境和社会等综合效益十分显著。但是, 现在的推广速度远远不能满足农业生产发展的需要。面对国内外农产品市场激烈竞争和我省生态环境脆弱及农民收入增长缓慢的严峻形势, 迫切需要大面积推广这一技术。因此, 针对推广中存在的问题, 应采取加强宣传、扩大规模, 典型引路、整体推进, 多方集资、加大投入, 扩大队伍、强化服务, 加强技术培训, 市场化引导、产业化发展等相应对策, 大力推广这一技术。

英文摘要:

The northern energy ecological model is a high efficient eco-agricultural pattern. This model has been promoted near 667 hm² in Shanxi province, and better economic, energy, ecological environment and social benefit were obtained. But now the speed of promoting is no further satisfied with the requirement of the development on agriculture of Shanxi province. Facing to the situations of the severe market competition of agricultural products, weak ecological environment and the slow increase of farmers' income, the model is urged to be promoted on large area in Shanxi province. Thereby, according to the problem of the expanding, countermeasures must be taken such as enhancing propaganda, taking largescale, demonstration pilot, overall progress, collecting fund in many ways, adding investment, enhancing service and technical train, market directing, industrial development to promoting the technique.
