LUBMAT 2014 is the Fourth European Conference and Exhibition on "Lubrication, Maintenance and Tribotechnology" addressing :

Lubrication Management

Tribology

Lubricants & Additives

Special Fluids

Efficient Maintenance and Operation

Reliability & Sustainability

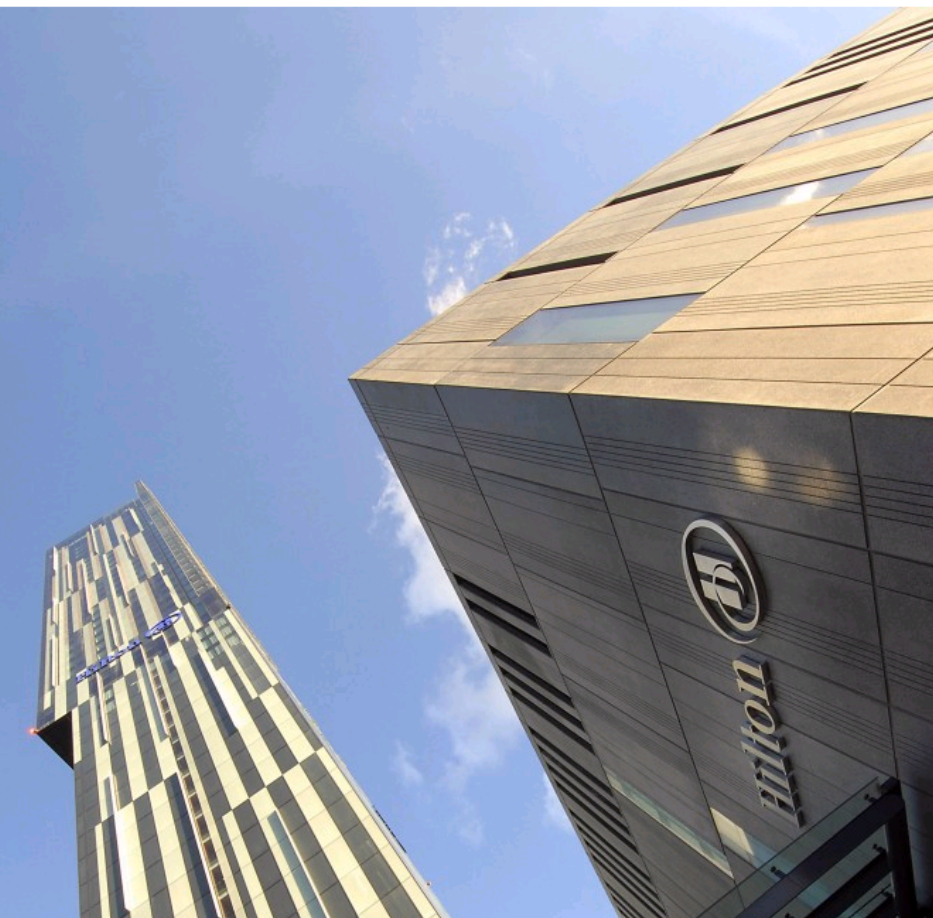

Contributors are invited to submit papers on these themes in any engineering application, but LUBMAT 2014 also has the special theme of **"Energy Systems"** and invites contributions to special sessions considering maintenance, lubrication and tribology in the design and operation of components in power generation systems and transmissions across a range of energy applications including: wind energy systems, marine and offshore power-plant, nuclear power generation, stationary engines, save power systems, tidal power systems, solar energy collection, internal combustion engines, gas turbines, hydro power systems.

For information about the all topics that will be covered see [call for papers](#).

NEWS

ABSTRACT SUBMISSION DATE NOW EXTENDED TO 28TH JANUARY 2014

SINGLE DAY ATTENDANCE FEE NOW AVAILABLE £275 PER DAY
