The Symposium on Logistics Systems and Services (LSS) addresses the most advanced research works on information and communication technology in Logistics and transportation. The technical areas include but are not limited to the following

- Pervasive and Ubiquitous Computing in Logistics
- Decision Support Systems
- Software Agent Based Systems
- Data Warehousing and Data/Web Mining
- Systems Interoperability and Integration
- Big Data & Logistics
- Nomad and Distributed Embedded Systems
- ICTS services design and management;
- ICTS services standards, locating, composition, and bundling

- RFID;
