The Symposium on Logistics & Supply Chain Management (LSCM) aims to bring together leading academic scientists, researchers and scholars to exchange and share their experiences and research results about all aspects of Supply Chain and Logistics Management, and discuss the practical challenges encountered and the solutions adopted. The technical areas include but are not limited to the following:

- Procurement and Supply
- Service Operations and Performance
- Supply Chain Management Development
- Forecasting
- Sustainable Supply Chain
- Risk Supply Chain Management
- Product Development
- Information Systems
- Supply Chain Configuration
- Supply Chain Management Performance
- Global Supply Chain Management
- Production and Delivery Synchronization
- Technology/Application for Supply Chain
- Technology Management
- E-Business and E-Commerce
- Energy Engineering

- Facilities Planning and Management
- Performance Management
- Human Factors and Ergonomics
- Lean and Six Sigma
- Modeling and Simulation
- Quality Control and Management
- Reliability and Maintenance
