摘要 用Normalized Cut (N-Cut) 准则分割图片时, 会出现诸如过分割或者欠分割的不理想情况。在N-Cut结果的基础上提出了一种改进算法: 利用合并-分裂方法, 将颜色和纹理相似的区域合并, 并对某些区域做进一步N-Cut分割。实验证明, 改进后的算法不仅保留了N-Cut方法的优点, 而且从一定程度上解决了过分割和欠分割的缺点, 能够处理一些自然界的彩色图片, 得到了比较理想的分割结果。

Improved image segmentation algorithm based on Normalized Cut

HUANG Yi-cen, SHEN Yi-fan

Department of Computer Science and Engineering, Fudan University, Shanghai 200433, China

Abstract

The over-segmentation or incomplete segmentation may happen when using Normalized Cut (N-Cut) to segment images. This paper proposes an improved algorithm based on the result of N-Cut using classic merge and split method: merge some segments with similar color and texture; split some segments further. Experimental results validate the effects on color natural images by this algorithm, which not only keep the advantages of N-Cut, but solve the problem of over-and incomplete segmentation as well.
