摘要 基于对有关战略联盟稳定性文献的综述, 提出具有层次结构的物流联盟稳定性评价属性模型。然后, 利用粗糙集和灰色的基本理论和方法, 建立基于粗糙集和灰色理论的物流联盟稳定性状况评价模型框架结构图, 并给出其中的基于分辨矩阵的指标属性约简算法, 优化评价指标。在此基础上, 使用灰色理论对物流联盟的稳定性状况进行评估。最后通过实例说明该模型的有效性及实用性。

Abstract

Following appropriate strategic alliance stability literature reviews, this paper proposes a kind of stability evaluation attribute model of the logistic alliance which contains hierarchical structure, and then, utilizing the basic theory and method of rough sets and grey, establishes a logistic alliance stability evaluation model framework, in order to optimize attributes, the heuristic attribute reduction algorithm based on discernable matrix is put forward. On this basis, the status of the logistic alliance stability is assessed by using the grey theory. Finally, an example which is cited shows the method is effective and valuable.

Key words rough sets grey theory discernable matrix logistic alliance stability
