On the Pólya Enumeration Theorem

PDF (Size: 184KB) PP. 172-173 DOI: 10.4236/iim.2009.13025

Author(s)

L. G. FEL

ABSTRACT

Simple formulas for the number of different cyclic and dihedral necklaces containing n_j beads of the j -th color, and \dots , are derived, using the Pólya enumeration theorem.

KEYWORDS

permutations and cyclic invariance, cycle index, Pólya enumeration theorem
