含碘酰基芳基吡喃酮类化合物(2a~2b)已被制备, 它们是通过在干燥苯中, 在N,N-二甲基甲酰胺存在下, 在三氯化磷存在下, 将相应的钠盐(1a, 1b)与三氯化碘反应得到的。研究了反应温度、时间及溶剂用量对2a和2b的产率的影响。结果表明, 在最佳条件下, 1a和1b的产率分别为95.5%和99.2%。该方法简便且适用于大规模合成。

Synthesis of Chlorinating Pyranone Ac Compounds with Thionyl Chloride-DMF System

TIAN Li-jun¹, ZHENG Shu-wei², LIU Xiao-dong², LIU Chun-hai²¹ State Key Laboratory of Fine Chemicals, Dalian University of Technology, Dalian 116012, China; ² Department of Chemistry, Bohai University, Jinzhou 121003, China

Abstract Chlorinating pyranone ac compounds(2a~2b)have been prepared by reaction of the corresponding sodium sulfonate(1a, 1b)with thionyl chloride in the presence of a catalytic quantity of N,Ndimethylformamide in dry benzene. The effects of reaction temperature, time, catalyst and solvent amount on the yield of 2a and 2b were investigated. The results show that chlorination of 1a and 1b under optimal conditions gives 2a and 2b in 95.5% and 99.2% yield respectively. The given method is facile and suitable for large-scale synthesis.
