The influence of
feeding diets
containing white
cheese, produced with
prebiotics and the
potentially probiotic
*Lactobacillus
plantarum* strain, on
the gastrointestinal
microflora of rats**

Czech J. Food Sci., 28 (2010): 139-145

The effects of inulin HPX and maltodextrins, and also the potentially probiotic *Lactobacillus plantarum* 14 strain, used separately and in combination in white cheese production, on the gastrointestinal microflora of Wistar rats was investigated. The prebiotic addition to the cheese was 2.5%, when
