

## Recent Applications of Some Active Control Systems to Civil Engineering Structures

**Author(s):** Septimiu-George Luca • Cristian Pastia • Florentina Chira

**Tomme:** LIII (LVII) | **Fascicle:** 1-2 | 2007

**Pages:** 21-28

**Abstract text:**

The application of control systems to civil engineering structures has been investigated in recent years to demonstrate the efficiency of these systems during exceptional natural events such as earthquakes and severe winds. In this paper, a review of some full-scale implementations of active and hybrid control systems for the protection of the civil structures to dynamic actions is performed.
