

Trends on Habitat Management

Author(s): Raluca Giușcă

Tomme: LIV (LVIII) | **Fascicle:** 3 | 2008

Pages: 77-81

Abstract text:

According to traditional image, human habitat constitution is the result of natural inter-relations, the fundamental premise of the existence of natural resources, the climate, and the access to more developed proximities for commercial trading. Human habitat represents a complex system, with environmental values, having live and natural components that are inter-related. The dwelling is the fundamental component of the habitat and by relationship with the other components determines the level of habitation.

Key Words:

Habitation; Management; Development.
