Pages: 139-143

Abstract text:

The modern landscape architecture being a profession that has an important impact on the environment, tries and succeeds to cover a very wide area. Because of its complex preoccupations area, the profession of the landscape architect may find itself in a nebula regarding the comprehension and the reaction of the public and cities mayors towards it. The landscape architecture has as purpose the realization of an ambience that is favourable to the human life progress, having in view the increasing of life's quality and of the urban comfort, the maintenance of the ecological equilibrium. Despite the complexity of its preoccupations, the landscape architecture has been often lowered to the same level with the exclusive arrangement of green spaces.
