

On the Deflection of Rectangular Plane Plates

Author(s): Florin Varlam

Tomme: L (LIV) | **Fascicle:** 1-4 | 2004

Pages: 17-22

Abstract text:

An accurate calculus is presented for the deflection coefficient of rectangular plates when they are loaded on two of their sides, for various cases of loading, from pure bending to uniform compression and for various ratios of the plates sides, as well as a comparison of these values with those calculated using the relations found in SR 1911-98.
