

## Experimental Research of Engine Foundations

**Author(s):** Doina Ștefan • Violeta-Elena Chițan

**Tomme:** L (LIV) | **Fascicle:** 1-4 | 2004

**Pages:** 35-42

**Abstract text:**

This paper tries a compact presentation of experimental research of engine-foundations. The dynamic phenomena are so complex, that the vibrations cannot be estimated in the design stage. The design engineer of an engine foundation must foresee through a dynamic analysis of the vibrations, those measures that lead to the avoidance or limiting of the bad effects caused by the vibrations.
