

Numerical Study of Stability of Cold Formed Built-Up Columns

Author(s): Raul Zaharia • Dan Dubina
Tomme: LI (LV) | **Fascicle:** 1-2 | 2005
Pages: 61-68

Abstract text:

By means of numerical simulations using ANSYS program, the stability behavior of built-up columns made of back-to-back cold formed C sections, bolted together by C stitches, is analyzed. Comparison of the numerical analysis with the results obtained using two different design methods and experimental results are provided.
