Human beings are facing serious problems of the energy, resources and environment. Green and sustainable chemistry (GSC) provides new opportunities to solve these crucial problems. It is not surprised that GSC has attracted more and more attention of government, academia, and industry.

In 2003, the 1st International Conference on Green and Sustainable Chemistry (GSC-1) was successfully held in Tokyo. As series conferences, the 2nd and 3rd International Conference on Green and Sustainable Chemistry (i.e. GSC-2 and GSC-3) were held in Washington D.C. in 2005, and in Delft in 2007, respectively. Asian and Oceanian region is active in GSC, and the 1st Asian-Oceanian conference on green and sustainable chemistry (AOC-1) was organized by Asian-Oceanian Network (AON) and Green & Sustainable Chemistry Network (GSCN) of Japan in 2007 in Tokyo. The above series conferences are held biennially. We are honored to have the chance to organize the joint conference of GSC-4 and AOC-2 during Aug. 20-24, 2009, in Beijing, China. The aim of the conference is to stimulate interaction and exchange of ideas between practitioners in the field of green and sustainable chemistry and to promote cleaner chemistry across the world.
