## 中国科学院城市环境研究所创刊“Watershed Ecology and the Environment (WSEE, 流域生态与环境)”国际英文期刊

| 2018-08-27 | 【大】 【中】 【小】 【打印】 【关闭】

中国科学院城市环境研究所与科爱森蓝文化传播有限公司(简称“科爱”)共同创刊Watershed Ecology and the Environment (流域生态与环境)国际英文期刊。该刊为是探讨流域尺度或流域内人类活动胁迫下(如城镇化及气候变化)自然资源、生物多样性、生物地球化学、水文学和环境质量等演变过程和适应机制,以及流域治理和管理策略与政策。该刊为季刊,将于2019年1月1日正式出版,我所中国科学院城市与健康重点实验室俞慎研究员出任主编,朱永官研究员、崔胜辉研究员、苏建强研究员、齐涛研究员、陈伟强研究员、徐耀阳研究员等担任期刊编委。期刊邀请了台湾大学蒋本基教授、清华大学杨大文教授、云南师范大学张虎才教授、英国生态与水文研究中心Alan Jenkins教授、美国新泽西州立大学Mark Robson教授、美国凯瑞生态系统研究所资深研究员/纽约城市大学Peter Groffman教授等出任副主编。

本期刊为从事环境科学、生物地球化学、生态学、水文学、经济学、社会科学等及其交叉学科的科研工作者和研究生服务,提供一个文理多学科交叉的学术交流平台。欢迎大家积极投稿,投稿网站: <http://www.keaipublishing.com/en/journals/watershed-ecology-and-the-environment/>。

“科爱”是由中国科技出版传媒集团有限公司(China Science Press)和爱思唯尔(Elsevier)世界领先的科学、技术和医学出版机构共同投资成立,为中国科学、技术和医学领域的英文期刊提供出版服务和科学评估及推出高水平国际英文期刊。

**Watershed Ecology and the Environment**

Watershed Ecology and the Environment (WSE) is an international multidisciplinary journal publishing original research papers, reviews, and short communications, which improve our knowledge of shifts and adaptations of resources, biodiversity, ecological functions, hydrological and environmental changes under various human disturbance pressures (such as urbanization) and changing climate patterns at a watershed scale or in watersheds. Given that the watershed is a basic geographical unit on Earth, multidisciplinary and integrative understanding at a watershed scale provide a platform for evaluating environmental response to land use and climate change. Knowledge from watershed studies may also provide solutions for environmental change or degradation caused by human disturbances. Therefore, studies and policies for watershed-based management are strongly welcomed. The Editors specifically welcome proposals for review articles.

The journal publishes high-impact contributions on but not limited to:

- hydrological, ecological and environmental responses to human disturbances in watersheds, i.e. urban development, land use/land cover changes, domestic animal cultivation, agricultural practices, aquacultural activities, mining and industrial activities, and environmental accidents, etc;
- biogeochemical cycles (flats, transport, and stoichiometric budget) and processes (functions) of water, nutrients, and contaminants in watersheds, including toxic metals and organic compounds, and contaminants apportionment;
- watershed-based ecological and health risk assessment for environmental pollution and mitigation strategies;
- watershed-based management and policies for resources, biodiversity, water, nutrients, and contaminants;
- long term monitoring, ecological and environmental studies of worldwide importance;

Articles submitted for publication in Watershed Ecology and the Environment should establish connections among research findings with implications for ecological sustainability, environmental quality, and/or human health at watershed scales. The abstract, highlights and conclusions of papers in this journal must contain clear and concise statements as to why the study was done and how readers will benefit from the results. The journal excludes studies only focusing on routine laboratory, hydrologic, and pot experiments for biochemical/physiological endpoints and experiments lacking a testable hypothesis or relevance at the watershed scale.
