2011年学术论文

(1) X. D. Zhang and G. H. Huang, Assessment of BTEX-induced health risk under multiple uncertainties at a petroleum-contaminated site: An integrated fuzzy stochastic approach, *Water Resources Research (American Geophysical Union)*, 47, Art. NO. W12533 (2011). (SCI IF = 2.737)

(2) Y. P. Cai, G. H. Huang, Q. Tan, and Z. F. Yang, An integrated approach for climate-change impact analysis and adaptation planning under multi-level uncertainties - Part I: Methodology, *Renewable & Sustainable Energy Reviews (Elsevier)*, 15(6), 2779-2790 (2011). (SCI IF = 4.842)

(3) Y. P. Cai, G. H. Huang, Q. Tan, and L. Liu, An integrated approach for climate-change impact analysis and adaptation planning under multi-level uncertainties - Part II: Case study, *Renewable & Sustainable Energy Reviews (Elsevier)*, 15(7), 3051-3073 (2011). (SCI IF = 4.842)

(4) H. Zhang, G. H. Huang, D. L. Wang, and X. D. Zhang, Uncertainty assessment of climate change impacts on the hydrology of small prairie wetlands, *Journal of Hydrology (Elsevier)*, 396(1-2), 94-103 (2011). (SCI IF = 2.433)

(5) X. D. Zhang, G. H. Huang, and X. H. Nie, Possibilistic stochastic water management model for agricultural nonpoint source pollution, *Journal of Water Resources Planning and Management (ASCE)*, 137(1), 101-112 (2011). (SCI IF = 1.275)

(6) H. Yu, G. H. Huang, J. Wei, and C. J. An, Solubilization of mixed polycyclic aromatic hydrocarbons through a rhamnolipid biosurfactant, *Journal of Environmental Quality (CSSA)*, 40(2), 477-483 (2011). (SCI IF = 2.291)

(7) L. He, G.H. Huang, and H.W. Lu, Bivariate interval semi-infinite programming with anapplication to environmental decision-making analysis, *European Journal of Operational Research (Elsevier)*, 211(3), 452-465 (2011). (SCI IF = 2.093)

(8) Q. G. Lin and G. H. Huang, Interval-fuzzy stochastic optimization for regional energy systems planning and greenhouse-gas emission management under uncertainty: A case study for the Province of Ontario, Canada, *Climatic Change (Springer)*, 104(2), 353-378 (2011). (SCI IF = 3.635)

(9) J. Wei, G. H. Huang, C. J. An, and H. Yu, Investigation on the solubilization of polycyclic aromatic hydrocarbons in the presence of single and mixed gemini surfactants, *Journal of Hazardous Materials (Elsevier)*, 190(1-3), 840-847 (2011). (SCI IF = 4.144)

(10) H. Yu, G. H. Huang, C. J. An, and J. Wei, Combined effects of DOM extracted from site soil/compost and biosurfactant on the sorption and desorption of PAHs in a soil-water system, *Journal of Hazardous Materials (Elsevier)*, 190(1-3), 883-890 (2011). (SCI IF = 4.144)

(11) X. D. Zhang, G. H. Huang, X. H. Nie, and Q. G. Lin, Model-based decision support system for water quality management under hybrid uncertainty, *Expert Systems with Applications (Elsevier)*, 38(3), 2809-2816 (2011). (SCI IF = 2.908)

(12) M. F. Cao, G. H. Huang, and L. He, An approach to interval programming problems with left-hand-side stochastic coefficients: An application to environmental decisions analysis, *Expert Systems with Applications (Elsevier)*, 38(9), 11538-11546 (2011). (SCI IF = 2.908)

(13) G. C. Li, G. H. Huang, Q. G. Lin, X. D. Zhang, Q. Tan, and Y. M. Chen, Development of a GHG-mitigation oriented inexact dynamic model for regional energy system management, *Energy (Elsevier)*, 36(5), 3388-3398 (2011). (SCI IF = 2.952)

(14) W. Sun, G. H. Huang, G. M. Zeng, X. S. Qin, and H. Yu, Quantitative effects of composting state variables on C/N ratio through GA-aided multivariate analysis, *Science of The Total Environment (Elsevier)*, 409(7), 1243-1254 (2011). (SCI IF = 2.905)

(15) Y. L. Xie, Y. P. Li, G. H. Huang, Y. F. Li, and L. R. Chen, An inexact chance-constrained programming model for water quality management in Binhai New Area of Tianjin, China, *Science of the Total Environment (Elsevier)*, 409(10), 1757-1773 (2011). (SCI IF = 2.905)

(16) J. Wei, G. H. Huang, H. Yu, and C. J. An, Efficiency of single and mixed gemini/conventional micelles on solubilization of phenanthrene, *Chemical Engineering Journal*

(Elsevier), 168(1), 201-207 (2011). (SCI IF = 2.816)

(17) Y. P. Li, G. H. Huang, and X. Chen, An interval-valued minimax-regret analysis approach the identification of optimal greenhouse-gas abatement strategies under uncertainty, *Energ Policy (Elsevier)*, 39(7), 4313-4324 (2011). (SCI IF = 2.436)

(18) Y.P.Cai, G.H.Huang, Q.Tan, and B.Chen, Identification ofoptimal strategies for improving eco-resilience to floods in ecologicallyvulnerable regions of a wetland, *Ecological Modelling (Elsevier)*,222(2), 360-369 (2011). (SCI IF = 2.176)

(19) Y.P. Li, G.H. Huang, N. Zhang, and S. L. Nie, An inexact-stochastic with recourse model developing regional economic-ecological sustainability under uncertainty, *Ecological Model (Elsevier)*,222(2), 370-379 (2011). (SCI IF = 2.176)

(20) Y. Lv, G. H. Huang, Y. P. Li, Z. F. Yang, and W. Sun, A two-stage inexact joint-probabilis programming method for air quality management under uncertainty, *Journal of Environmer Management (Elsevier)*, 92(3), 813-826 (2011). (SCI IF = 2.367)

(21) Y. M. Zhang, G. H. Huang, and L. He, An inexact reverse logistics model for municipal so waste management systems, *Journal of Environmental Management (Elsevier)*, 92(3), 522- 530 (2011). (SCI IF = 2.367)

(22) Y. P. Li, G. H. Huang, and X. Chen, Planning regional energy system in association with greenhouse gas mitigation under uncertainty, *Applied Energy (Elsevier)*, 88(3), 599-611 (2011). (SCI IF = 2.209)

(23) C. Dong, G. H. Huang, Y. P. Cai, and Y. Xu, An interval-parameter minimax regret programming approach for power management systems planning under uncertainty, *Applie Energy (Elsevier)*, 88(8), 2835-2845 (2011). (SCI IF = 2.209)

(24) Y. Zhu, G. H. Huang, Y. P. Li, L. He, and X. X. Zhang, An interval full-infinite mixed-inte programming method for planning municipal energy systems - A case study of Beijing, *Applied Energy (Elsevier)*, 88(8), 2846-2862 (2011). (SCI IF = 2.209)

(25) L. Cui, L. R. Chen, Y. P. Li, G. H. Huang, W. Li, and Y. L. Xie, An interval-based regret- analysis method for identifying long-term municipal solid waste management policy under uncertainty, *Journal of Environmental Management (Elsevier)*, 92(6), 1484-1494 (2011). (S IF = 2.367)

(26) Y. P. Li and G. H. Huang, Optimization of regional economic and environmental systems under fuzzy and random uncertainties, *Journal of Environmental Management (Elsevier)*,92 (8), 2010-2020 (2011). (SCI IF = 2.367)

(27) S. Wang and G. H. Huang, Interactive two-stage stochastic fuzzy programming for water resources management, *Journal of Environmental Management (Elsevier)*, 92(8), 1986-199 (2011). (SCI IF = 2.367)

(28) H. Zhang and G.H. Huang, Assessment of non-point source pollution using a spatial multicriteria analysis approach, *Ecological Modelling (Elsevier)*,222(2), 313-321 (2011). (S IF = 2.176)

(29) Y. M. Zhang and G. H. Huang, Inexact credibility constrained programming for environmental system management, *Resources, Conservation and Recycling (Elsevier Scien 55(4), 441-447 (2011). (SCI IF = 1.987)

(30) S. Wang, G. H. Huang, H. W. Lu, and Y. P. Li, An interval-valued fuzzy linear programmi with infinite α -cuts method for environmental management under uncertainty, *Stochastic Environmental Research & Risk Assessment (Springer)*, 25(2), 211-222 (2011). (SCI IF = 1.419)

(31) Y. Zhou and G. H. Huang, Factorial two-stage stochastic programming for water resourc management, *Stochastic Environmental Research & Risk Assessment (Springer)*, 25(1), 67- (2011). (SCI IF = 1.419)

(32) Y. P. Cai, G. H. Huang, X. Wang, G. C. Li, and Q. Tan, An inexact programming approach for supporting ecologically sustainable water supply with the consideration of uncertain wa demand by ecosystems, *Stochastic Environmental Research & Risk Assessment (Springer)*, (5), 721-735 (2011). (SCI IF = 1.419)

(33) G. H. Huang and M. F. Cao, Analysis of solution methods for interval linear programming *Journal of Environmental Informatics (International Society of Environmental Information Sciences)*, 17(2), 54-64 (2011). (SCI IF = 1.145)

(34) H. G. Sun, Y. P. Li, G. H. Huang, and M. Q. Suo, An inexact fuzzy-queue programming model for environmental systems planning, *Engineering Applications of Artificial Intelligenc (Elsevier)*, 24(5), 840-849 (2011). (SCI IF = 1.444)
