艾滋来了, 企业咋办? (林俊青) P80

英文目录:

2005年第11期英文目录

P10 Work Safety Defines as One Major Objective in the 11th Five-Year Plan
The proposal for formulating the 11th Five-Year Plan deliberated and adopted by the 5th Plenary Session of the 16th CPC Central Committee defines “further improvement of work safety” as a major objective of socioeconomic development.

P10 State Council: All-round Rectification of Mineral Resources Development Order

On September 18, the State Council issued a notice, requiring the People's Government of provinces, autonomous regions and municipalities directly under the State Council as well as various ministries and commissions and agencies under the State Council to administer according to law, use economic means to rectify and standardize the order of mineral resources development with coal development as the focus.

P 11 The Conference of International Risk Management Council Held

The 2005 Conference of International Risk Management Council was held in Beijing on September 20 and 21. The Representatives were officials, experts, scholars and peoples of industrial community from over 30 countries and international organizations. The theme of this Conference was Global Strategy of Implementing Risk Management. The Representatives discussed how to guard against potential risks, build national emergency system and strengthen international information exchange and cooperation in the globalization of economic and scientific development.

P11 China Strives to Set up New System of Food Safety Standards in 2006

Mr. Li Zhonghai, Director of State Standard Commission, stated on October 14 that, by the end of this year, the proportion of international indexes that adopted in the major indexes of China food standard will have been increased from the current

20% to 55%. The State Standard Commission will introduce a group of state food standard plans as soon as possible and will try to basically complete new system of food safety standards next year.

P11 Beijing Set up Travel Accident Reporting System

On September 15, Beijing Tourism Administration issued travel accident reporting system. According to the system, the operators will report to relevant authorities in time if major travel accidents occur. The system also defines the scope of travel accident: accident involving person or property of tourists; major fire and other grave accidents involving tourist accommodation, traffic, sight-seeing, entertainment and shopping; accidents involving other serious economic losses of tourists and tourism operators.

P18 Paradox of Industrial Management System

Since 1998, many enterprises have lost their sense of belonging with separation from their competent authority, and meanwhile, the industrial associations are unable to offer much help due their limited functions, so these enterprises have to resort to self-discipline. At the same time, the safety management of such industries as railway, civil aviation, construction, etc is still on the same track. Such central enterprises as China Petroleum, China Petrochemicals, the Weapon Industry Corporation, etc. combine industrial management with enterprise responsibility. Therefore, the safety management in China entered into a dilemma characterized by weakening of industrial management in system and inability to do without industrial management in behavior.

Cover: Overwork Death

Not long ago, two young teachers of Tsinghua University died within four days, one 36 years old, and the other 46. According to the survey of State Restructuring Commission, the average life of the intellectuals of China is 58. Also, according to survey of some organizations, people sub-health rate is 75.31% in Beijing, 73.49% in Shanghai and 73.41% in Guangzhou. In such places as Shenzhen and Shanghai, 66% of people are plagued by dreaminess, insomnia, difficulty to fall asleep; 62% of people suffer from frequent distress in the loins and backache; 57% of people suffer from hypomnesia; 48% of people have irascibility and anxiety. All these symptoms are apparent characteristics of overfatigue.
