P 11 Reviews of China' s Work Safety in 2005

China' s work safety in 2005 have too much of work safety experience, including the promotion of the State Administration of Work Safety to State General Administration of Work Safety, the transfer of Li Yizhong as the general administrator, the closedowns of unqualified coalmines, and the efforts to settle Jilin benzene factory blasts and so on. But in the course of the complicated change, we can see a turn for the better as the government and whole society are paying greater attention to work safety.

Seven Works to Settle Migrant Workers Problem

The January 18 State Council executive meeting stressed to: Settle migrant workers' low pay and payment in arrears; Regulate their labor management according to law; Improve their employment service and occupational technical training; Take active and steady measures to settle their social security problems; Provide them practical public service; Make sound their rights and interests guarantee mechanism and Promote transfer of rural labor to nearby places.

China Build a Work Safety Technical Support System within Two or Three Years

To meet the urgent need of work safety, China is building a work safety technical support system within two or three years through building four national and 32 provincial central laboratories. When completed, these projects will form an advanced scientific research and test capacity of identifying major dangers, appraising major hidden dangers, appraising, investigating and analyzing extraordinary, exceptional and complicated accidents. The overall investment is estimated at nearly 500 million yuan.

Coalmine Enterprises is Required to Deposit Risk Mortgage

From January 1, 2006 all coalmine enterprises across the country are required to deposit safe production risk mortgage under corporate names for enterprise safe production accident salvage, relief rescue and aftermath treatment. The mortgage shall not be divided among the workers in any form and the practical spending shall be calculated into the cost of production, to be placed in front of paying enterprise income tax. Accounting calculations are to be settled according to the unified state accounting system.

Police to Teach about Safety in Schools

The ministries of public security and education issued a joint notice requiring policemen to publicize traffic safety at primary and secondary schools at least twice a semester. The notice stressed the necessity to reinforce traffic order at and round primary and secondary schools and correct and penalize traffic offenses in a bid to reduce potential traffic accidents involving primary and secondary school students.

Safe Development, National Prosperity and People' s Harmony Set as Theme of National Work Safety Month in 2006

Mr. Huang Yi, spokesman of SAWS told a press conference in a recent high-profile media symposium that safe development, national prosperity and people' s harmony will be the theme of national work safety month in 2006, adding that we shall continue to face a stern challenge in production safety in the new year We must therefore work hard to improve our own work to promote sustainable economic development and ensure people' s peaceful and happy lives.

Key Works of SAWS This Year

In 2006 work safety responsibility will be separated into different parts and shared by enterprises, governmental departments concerned and governments at all levels, and will be set as an important component of political and career performance examinations. Investigations will be made into neglect or dereliction of duty by civil servants, into abuse of power for private gains, bureaucrat-merchant collusion, power-and-money trade-off and other corruption practices. Supervisory law enforcement will be strengthened; so will be publicity and education, and whole society safety awareness.

State Council Issues National Public Emergency Contingency Treatment Scheme

The State Council issued recently a national public emergency contingency treatment scheme, requiring meting out administrative sanctions to persons in charge according to law who make delayed or false or omitting reports in major emergencies; and investigating into the criminal liabilities if the case constitutes a crime.
