英文目录:

P12 SAWS and ACFTU Jointly Conduct Special Supervision of Labor Protection Products

State Administration of Work Safety (SAWS) and All-China Federation of Trade Unions (ACFTU) will conduct a six-month-long nationwide special supervision of the availability, management and use of labor protection products in production and management units. The check and supervision will focus on all kinds of mines (including petroleum and natural gas exploration and coal mines), chemical industrial enterprises, architectural construction enterprises, metallurgy and manufacturing enterprises.

P12 Shanxi Explore Remunerative Use of Coal Resources

Shanxi, one of the most coal-rich provinces in China, is exploring to introducing a system of remunerative use of coal-mine exploitation rights, which will replace the existing state appropriation of coal resources gratis. It aims to orientate the coal-mine owners off from short-term exploitation, at the same time to enhance resource recovery rate, increase safety inputs, and establish a new model of coal resource management system which will integrate responsibility, rights and

profits in it.

P13 Shanghai Issue on Shorten or Stop Work Hours on High Temperature Days

On July 5 six Shanghai municipal governmental departments jointly issued to all the enterprises and institutions on adjusting or shortening work hours on high temperature days. The municipal departments included labor and security, safety supervision, health and food and pharmaceuticals supervision bureaus, as well as economic, construction and communications commissions. It informed all the enterprises and institutions that the high-temperature and outdoor operations industries must adjust or shorten work hours when temperature rises past 35 °C. It added that the enterprises and institutions whose working environment cannot endure extremely-high temperature can stop the work and give breaks when the temperature pasts 38 °C except the important sectors which connect closely with people' s livelihood, city operation security and people' s subsistence needs.

P28 The First National Work Safety and Technical Equipment Exhibition was Held in Beijing

From July 14 thru 17, the first national work safety and technical equipment exhibition was held in Beijing with the theme of " people first and building a harmonious socialist society" . The high tech products make all the visitors find everything new and fresh . During the exhibition, the organizing committee sponsored the first China National Enterprise Work Safety High Level Forum. More than 400 experts and persons in charge of large enterprises had an exchange their views on key and hot issues in the safety areas. They enter into from the aspects of introducing more effective laws and regulations, further implementing responsibilities, promoting scientific and technological progress, increasing inputs and pushing safety and cultural development.

P34 Infrastructure Industry Management must be Strengthened

The 8th State Council Work Safety Committee liaison members meeting was held in Beijing on July 20. More than thirty ministries and commissions' representatives attended the meeting, including the ministries of public security, communications, and construction, the commissions of development and reform, science and industry for national defense, and power regulation, the general administration of quality control and state administration of work safety. SAWS Minister Li Yizhong said that it is imperative to control of infrastructure industry management in the current safety works. He suggested the method that joint enforcment of laws which may be an effective measure to solve law enforcement problems.

P52 Make Full Use of Existing Resources and Carry Out Effective Safety Education

Qingdao Alkaline Stock Co., Ltd. was not the first to set up labor protection education room and exhibition room in China. But they have insisted for a long time of more than 18 years.. For eighteen years they have fully use the two rooms as major safety resources, and bringing magnificient results. By now the company has won the glorious municipal title of Outstanding Work Safety Unit for 15 consecutive years.

Front Cover

EPPE100---China Safety Industrial and Commercial Model

On June 28 Shanghai Pudong Zhangjiang Power Port was a scene of bustling activity under the theme of safety – professional protection and the inauguration of EPPE100 safety protection port. EPPE100 adopted the sale of five services in one center, quite a brand new model in China in the area. The services integrated were chain sale, network real time sale, DM sale by post, professional logistic sale and round-the-clock emergency sale, meeting the needs of the users in a " one-stop" manner. During the ceremony representatives of Shanghai municipal quality and technical supervision bureau, the district and county work safety bureaus, industry associations concerned and well-known safety protection producers at home and abroad as well as large and medium-sized enterprises held a declaration signing ceremony to fight counterfeiting and protect quality livelihood. The aim was to initiate common boycott of counterfeit goods and set up a clean safety protection market environment. Present on the occasion were directors of SAWS Planning and S&T Department, China Safety Academy, Shanghai Municipal Safety Supervision Bureau and Shanghai Pudong New Area Economic and Trade Bureau.
