2004年第12期英文目录

P13 Forum on Central Enterprise Safe Production Permits of Dangerous Chemicals Held in Beijing
On Nov 5, the Department of Dangerous Chemicals Supervision of State Administration of Work Safety (SAWS) called a forum on central enterprise safe production permits of dangerous chemicals. The objective of the forum was to examine the enterprises which product dangerous chemicals, and ensure the completion of issuing the safe production permits before the end of 2004. The meeting discussed and initially passed the Scheme of Examination on Application by Enterprise Headquarters under Central Administration Producing Dangerous Chemicals for Safety Production Permits

P13 SAWS Standardizes Issuance of Non-Coal Mine Permits
On Oct 25, SAWS standardized the examination and issuance of safety permits to non-coal mines in the form of answering the questions from Administration of Work Safety of Hebei, Shandong and Fujian province. The reply involved six aspects: industrial injury insurance, the plan of minitype mine, the periods of the project, the gangue field, the non-coal mine of low fatallness.

P13 National Forum on Safety Assessment Held in Chengdu

On Oct 23 and 24, SAWS called a forum on safety assessment in Chengdu. Participants studied some laws and statute about safety, and they also studied the related policies, which issued in recent years. . Meanwhile, they discussed means and measures that can order the work of agencies, communicated the experience in safety assessment, demonstrated the technical criterion, and allocated the tasks for the later.

P13 GPS Promoted in Transport of Dangerous Chemicals in Beijing

In Beijing, there are 2680 dangerous chemical trucks, which owned by 155 enterprises, 11 percent of those trucks have been installed GPS. Through GPS the drivers can know the location, the route, the mileage, the velocity, and so on. If the truck disobey the criterion, the system could give an alarm at once. Regulators of enterprise and inspectors in government can also tail and monitor the loaded trucks at any moment.

P13 Shanghai World Expo Public Transportation System to Ensure Emergency Refuge for 600,000

During the 2010 World Expo in Shanghai, the public transportation system can meet the require that get to the Expo area from any other urban area within one hour, and from the Yangtze River Delta to and back from the Expo within 2.5 ~3 hours on the same day. It can also ensure disperse 600,000 people within 2 ~ 3 hours in case of emergency.

P13 69 County Officials in Shanxi Investigated and Punished in Four Years for Mine Accidents

From 2001 to September 2004, investigation and punishment were conducted into more than 770 persons responsible for serious and extraordinary coalmine accidents, including 69 cadres at vice magistrate level and above. To prevent cover up, the Shanxi provincial authorities demanded that chief mass media disclosures of the causes behind the accidents, the persons held responsible and the handling results. Departments involved in the case investigations and handling were to supervise the execution departments to prevent casual excessive or reduced treatment, procrastinated treatment or even non-treatment at all. They were also required to give circulars on such accidents.

P12 National Coal Mine Work Safety Conference Held in Beijing

On November 11 and 12, a national forum on coal mine work safety was held in Beijing. Addressing the forum, State Councilor Hua Jianmin stressed that guaranteeing the sustainable, healthy and stable development of the coal industry was an important task of great concern to the overall situation in national economy development. Availability measures must be stepped up in the upcoming winter and next spring to crack down on coal mine accidents especially gas explosions.

P12 Safe Production Campaign in Zhejiang Kicked off in Mid November

Starting on November 16, the Safe Production Campaign in Zhejiang Province was sponsored by the reporting teams of some one dozen mass media including People' s Daily, Xinhua News Agency, the CCTV and Modern Occupational Safety Magazine. The teams were to make in-depth coverage of occupational dangers and diseases in Yongkang and Wenzhou in Zhejiang province.

Cover (Focus): Daping Wu' an Coal Mine Accident

October 20, 2004 witnessed two extraordinary coalmine accidents in Henan and Hebei provinces: One was the gas explosion at Zhengmei Group Daping Coalmine; the other was the water permeation accident in Wu' an Desheng Coalmine, 170 miners died in the accident. In the tragedies, victims' families suffered the most. But to what extent? The magazine presents the readers from the other side of the disaster : the families that had been non-too-better-off were now to trudge along under heavier economic burdens than expected.
