 New Publication: ILO and OSH by Liu Tiemin Zhu Changyou and Yang Nailian

P8 Executive Meeting of the State Council Chaired by Premier Wen Jiabao  
 On April 14, Premier Wen Jiabao chaired the executive meeting of the State Council to hear the debriefing by the Ministry of Supervision regarding the investigation of the following extremely major accidents: natural gas well gushing accident of Chuandong Drilling Company under China National Petroleum Corporation, "February 5" casualty-causing stampede in Miyun County, Beijing and "February 15" fire disaster that occurred in Zhongbai Commercial Building in Jilin City, Jilin Province. He delivered a speech at the meeting and pointed out that the penalization of the persons held accountable for these three major accidents has demonstrated that the Party Central Committee and the State Council are highly responsible for the safety of people's life and property and also shows their resolve to manage the government according to strict rules and to administrate according to laws. Huang Ju, Vice Premier of the State Council, also made a speech at the meeting.

P8 Chlorine Leakage in Chongqing Municipality, 150,000 People Evacuated in Emergency  
 In the evening of April 15, a chlorine leakage accident occurred in Chongqing Tianyuan Chemical General Plant located in Jiangbei District, Chongqing Municipality and about 150,000 people were evacuated. On April 17, Premier Wen Jiabao of the State Council gave an important instruction regarding the handling of the accident and the problems arising from it and pointed out that a good job should be done regarding the emergency rescue and disaster relief and the hidden risks should be thoroughly eliminated. At 17:35 April 18, the chlorine leakage and explosion risks that threatened tens of thousands of residents' life in Chongqing Municipality were removed.

#### P8 Work Safety of Non-stated-owned Enterprises talked by Wang Xianzheng

On April 10, the national spot conference on safety supervision on non-stated-owned enterprises was held in Foshan City, Guangdong Province. Wang Xianzheng, Director of the State Administration of Work Safety, made a speech and pointed out that the work safety of non-stated-owned enterprises had become a prominent issue in the field of work safety at present. This not only negatively influences the steady improvement of work safety situation through out the whole country but also seriously hinders the healthy development of non-stated-owned economy.

#### P8 Beijing: Fire Inspection to Be Carried Out Every Two Hours in Public Places

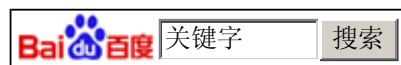

As of April 20, Beijing Municipality will implement the Method of Management and Supervision of Fire Fighting Safety Responsibility of Beijing Municipality. The newly added parts of this Method stipulate that public security and fire fighting organizations have the right to make a announcement through media or setting up warning signs for those public places that have major hidden fire risks. It has listed such public places as marketplace, hotel, dance hall, cinema, theater, hospital and school etc. as the key units for fire inspection and emphasized that in public places fire inspection should be conducted at least every two hours. Both before and after business hours, a thorough fire inspection should be carried out at the business site.

#### P23 Liucheng County Government Helps Farmers to Develop Economy

Liucheng County, Liuzhou City, Guangxi Zhuang Autonomous Region, after shutting down small-scale coal mines within the county, actively helps the farmers in mining area to develop economy. 70% of the economic revenue of the county comes from cane sugar. Governments at county and township levels try to raise capital through various channels, adopt re-cultivation measures, distribute the cultivable land in the mining area to farmers of the region, guide and support the villagers to plant sugar cane so as to help them to develop the economy. Up to the present, over 100 mu of sugar cane and 250 mu of fruit trees have been planted in the mining area, laying a good foundation for the villagers of the mining area to increase their income.
