abstract Physical and some frictional properties of African nutmeg (*Monodora myristica*), a wild perennial edible plant, were investigated at a moisture content level of 10%. Measured values for sphericity, unit volume, average geometric diameter, true density, bulk density, surface and projected areas were 0.74, 0.00012 m<sup>3</sup>, 0.00012 m, 1100 kg/m<sup>3</sup>, 100 kg/m<sup>3</sup>, 0.00012 m<sup>2</sup> and 0.00012 m<sup>2</sup>, respectively.
