Categories	Technical Reports
Author	C. Mohanan
Publisher	INBAR
Year	1996
Ordercode	TR10
Pages	228

DESCRIPTION

This manual provides a comprehensive documentation of the diseases of bamboo, during its entire life cycle. It is well-illustrated to make understanding and identification of diseases easy. Information on diseases and disorders of bamboos from different Asian countries is assembled in this book. It is of immense value to those involved in entomological studies and bamboo management as most pathogens are covered (a total of 440 fungi, 3 bacteria, 2 viruses and a phytoplasma), along with details of diseases distribution pattern in Asia.

The manual has 134 illustrations/plates, extensive bibliography and glossary, and immensely useful checklists of diseases and pathogens that affect bamboo nurseries, stands and seeds.
