INSECT PESTS OF BAMBOOS IN ASIA - AN ILLUSTRATED MANUAL (1/4) [« TECHNICAL REPORTS](#) [« DOWNLOADS](#)

Date posted	September 28, 2012
Downloaded	1986 times
Categories	Technical Reports
Author	Haojie Wang, R.V. Varma, Tiansen Xu
Publisher	INBAR
Year	1996
Ordercode	TR13
Pages	200

DESCRIPTION

As bamboos are now being grown more intensively in plantations, the need for a better understanding of and an increased vigilance against bamboo insect pests becomes both essential and urgent. This illustrated manual represents an important step towards publicizing the threat posed by these pests, and provides a consolidated account of existing knowledge.

Conceived as a companion volume to *Diseases of Bamboos in Asia: an Illustrated Manual*, the manual is an attempt to redress the extreme paucity of information on insect pests of bamboos. The pests are conveniently grouped according to their feeding habits and the parts of bamboo they affect, amply supported by 75 illustrations/photos of the most common insect pests found in Asia. Details of hosts, distribution, biology and control measures of all major pests are provided. The publication also discusses integrated pest management methods, the main constraints faced and the research areas that need to be strengthened.
