### DESCRIPTION

The book is the report of a consultative meeting on the constraints to the production of bamboo and rattan. Various facets of the production process are examined. The two major issues delivery systems and sustainable management of natural stands have been

The establishment of a reliable delivery system of mass propagation through tissue culture, has been examined. The constraints of each method listed.

Research lacunae in ecological aspects and socio-economic aspects of anthropogenic stands of bamboo and rattan have been examined. The publication charts out a much-needed direction for the development of the two plants.

This easy-to-follow book is useful for academics, as well as for the regular production of bamboo and rattan.
