DESCRIPTION

This publication reviews in detail different techniques and examines issues related to the transfer of these among the International Network for Bamboo and Rattan (INBAR). It is investigated in terms of physical and mechanical properties, durability of bamboo, and biodegradation during storage. Modern technologies are covered, and the environmental treatment of bamboo are examined in detail. The reference is particular to professionals involved in bamboo preservation. More than 15 sketches, maps and figures elucidate the subject matter. The book has a compendium comprising five appendices. It is an account of bamboo preservation techniques. The explanation is oriented to practical application.
