2009;47(4) : 153-156

### Renal Cell Carcinoma in Transplanted Kidney

M. Naroienjad, R. Salouti

#### Abstract:

Immunosuppressive drugs are prescribed routinely to kidney transplant recipients to prevent rejection. These medications are associated with an increased risk of secondary malignancies, including renal cell carcinoma in the transplanted kidney itself. We present a case of renal cell carcinoma in a transplanted kidney.
