AN ASSESSMENT OF PERSONALITY ASPECTS OF THE STUDENTS OF TEHRAN UNIVERSITY OF MEDICAL SCIENCES

B. Nikpour, F. Madjlessi , H. Honarpisheh

Abstract:

In this study a base-scale is prepared for the evaluation of the personality grounds of the Tehran University of Medical Science students. Such a scoring scale may be useful to help the medical science students in career development, psychosocial consultations, and appropriate supportive care plans. A sample of 205 female and male students resident in dormitories were evaluated using "Bernreuter" personality questionnaires and computer programs prepared in this center. The percentiles of each scale is scored and represented in a systematic framework. Considering the normal distribution of the results using their means and standard deviations, the important percentages in each scale is tabulated.

Keywords:

Personality aspects . Personality examination . " Bernreuter" test
