

IT changes everyday's life, especially in education and medicine. The goal of 2009 IEEE International Symposium on IT in Medicine & Education (ITME 2009) is to further explore the theoretical and practical issues of IT in education and medicine. It also aims to foster new ideas and collaboration between researchers and practitioners.

The organizing committee is soliciting unpublished papers for the main conference and its special tracks. All submitted papers will be reviewed by at least two program committee members and will be accepted based on their originality, significance, relevance, and clarity of presentation. Accepted papers will be published in the IEEE categorized conference proceedings (will be indexed by EI & ISTP). Authors of selected papers will be invited to submit revised and expanded version of their papers to be considered for a further publication in special issues of well-known Chinese or English journals cited by SCI or EI.

NEWS
