"Progressive Pseudorheumatoid Chondrodysplasia: Report of a case "

"Ashraf Zadeh F, Davachi B, Naseh A, Mehdizadeh H "

Abstract:

Progressive Pseudorheumatoid Chondrodysplasia a rare disorders. Signs and symptoms of the disease developed between three and eight years of age. Patients show clinically and radiographically continued cartilage loss and destructive bone changes as they age. In this article we report on a 6-year old boy who had been referred to our neuropsychiatric clinic for neuromuscular survey.
