Essai de Depistage Systematique de la Poliomyelite au Dispensaire de L'hopital Bahrami Teheran

Sadegh Mokhtarzadeh

Abstract:

The foundation of an hospital with a specialized dispensary allowed the authors to undertake a study of the poliomyelitic disease on a sufficient number of children to afford the necessary clinical factor to the epidemiological surveillance of the disease in a town under full hygienic transformation. These first results indicate a present increase of paralytic poliomyeliti
