Clinical Experience with Magnetic Resonance Imaging in Internal Derangements of the TMJ

Raphael T. Schach;^a P. Lionel Sadowsky

^aDr. P. Lionel Sadowsky, Department of Orthodontics, University of Alabama, Birmingham, Alabama 35294

ABSTRACT

Evaluation of magnetic resonance images of 50 symptomatic temporomandibular joints in 26 individuals indicates that this is a useful modality that can replace the invasive arthrographic method in some cases.

Dr. Schach is a Major in the United States Army Dental Corps., presently stationed in Seoul, Korea. He holds a D.D.S. degree from Georgetown University and an M.S. degree in Orthodontics from the University of Alabama School of Dentistry

Dr. Sadowsky is a Professor in the Department of Orthodontics, University of Alabama at Birmingham. He is a Dental graduate of the University of Witwatersrand (B.D.S.) and of the University of Alabama (D.M.D.), and holds an M. Dent. degree in Orthodontics from the University of Witwatersrand and a Certificate in Orthodontics from the University of Alabama School of Dentistry. He is a Diplomate of the American Board of Orthodontics

KEY WORDS: IMAGING, MAGNETIC RESONANCE IMAGING (MRI), TMJ.
