Maxillary Incislabial Responses in Class II, Division I Treatment With Fränkel and Edgewise

Albert H. Owen, III^a

^aDr. Albert H. Owen, Suite B-101, 3624 North Hills Drive, Austin, TX 78731

ABSTRACT

Fifty patients treated with Fränkel and fifty treated with Edgewise appliances are compared, finding Edgewise more effective in maxillary retraction and torque control, and Fränkel producing less undesirable lip retraction.

Dr. Owen is in the private practice of orthodontics in Austin, Texas. He is a dental graduate (D.D.S.) of Baylor University in Dallas, and holds an M.S.D. in orthodontics from the same institution. He is a Diplomate of the American Board of Orthodontics

KEY WORDS: EDGEWISE, LIP, FRÄNKEL, MALOCCLUSION, CLASS II.
