Stiffness Changes in Thermodynamic Nitinol With Increasing Temperature

George Andreasen;^a Henry Heilman; Diane Krell

^aDr. George Andreasen, The University of Iowa, College of Dentistry, Department of Orthodontics, Iowa City, IA 52242

ABSTRACT

Load-deflection measurements on wires fabricated from a new Nitinol alloy which undergoes physical transformations affecting elastic response at body temperature.

Dr. Andreasen is Professor of Orthodontics at The University of Iowa College of Dentistry. He holds a B.S. degree with a Major in Engineering, D.D.S., and M.S. in Orthodontics from the University of Nebraska. He is a Diplomate of the American Board of Orthodontics

Dr. Heilman is in the private practice of orthodontics in Hudson, Wisconsin. He is a graduate (D.D.S.) from the University of Iowa, and an M.S. in Orthodontics from the same institution

Diane Krell is a Research Assistant in the Department of Pedodontics at The University of Iowa. She holds a B.S. degree in Microbiology from Louisiana State University

KEY WORDS: ELASTICITY, STIFFNESS.
