Class II, Division 2 Peatment and Mandibular Growth

Leity P. Erickson;^a W. Stuart Hunter

^aDr. Leity P. Erickson, Division of Orthodontics, Faculty of Dentistry, Dalhousie University, Halifax, Nova Scotia, CANADA

ABSTRACT

A statistical evaluation of relationships between orthodontic treatment of Class II, Division 2 malocclusion and mandibular growth and position, finding significant positive effects of treatment.

Dr. Erickson is in the private practice of Orthodontics in Dartmouth, Nova Scotia, and also a Clinical Demonstrator with the Faculty of Dentistry at Dalhousie University in Halifax. He holds B.Sc. and D.D.S. degrees from Dalhousie University, and a degree in Orthodontics from the University of Western Ontario in London, Ontario

Dr. Hunter is Professor and Chairman of the Division of Orthodontics at the University of Western Ontario. He is a dental graduate (D.D.S.) of the University of Toronto, with M.S. and Ph.D. degrees from the University of Michigan

KEY WORDS: BITE PLANE, GROWTH, MALOCCLUSION, CLASS II, DIVISION 2, MANDIBLE, CERVICAL TRACTION.
