The Effect of Lower Second Molar Extraction on Late Lower Arch Crowding

MARGARET E. RICHARDSON^a

^aMargaret E. Richardson, Orthodontic Department, School of Dentistry, Royal Victoria Hospital, Grosvenor Road, Belfast, BT12 6BA, NORTHERN IRELAND

ABSTRACT

A preliminary study, finding distal movement of buccal teeth and reduced anterior crowding following lower second molar extraction. Third molar occlusion is not evaluated.

Margaret Richardson is Associate Specialist Orthodontist at the School of Dentistry in Belfast, Northern Ireland. She holds B. Dent. Sc. and M. Dent. Sc. degrees from Trinity College in Dublin and a Diploma in Orthodontics from the Royal College of Surgeons in London
