HERBAL AND PHARMACOGNOSTICAL STUDY OF TANG-KWEI, RADIX ANGELICAE SINENSIS

CHAO Y-HUANG Bu Y-TSE WANG SHI AO-TAO MAO HWA-SHI UNG

Abstract:

Tang-kwei, the root of *Angelica sinensis* Diels, is a famous Chinese drug often used in the treatment of women's diseases. A brief review of its chemical and pharmacological studies is given. The authors made a critical study of the sta- tements and descriptions in the ancient herbals and related classicals concerning this drug and discussed the botanical origin of Tang-kwei. The morphology, histology and diagnostic characters of the powdered drug are examined and described in detail with plates of illustrations.
