中文摘要:目的:对民间药材石油菜的化学成分进行研究。方法:用硅胶、葡聚糖凝胶Sephadex LH-20等手段进行分离纯化,并通过¹H-¹³C-NMR,MS等谱图方法鉴定结构。结果:分离鉴定了17个化合物,其中酚酸类6个,分别为苯甲酸(benzoic acid, 1),对羟基苯甲醛(4-hydroxy benzaldehyde, 2),香豆酸(coumaric acid, 3),原儿茶酸(protoocatechic acid, 4),没食子酸(gallic acid, 5),对羟基苯甲醛(4-hydroxy benzaldehyde, 6);含N化合物6个,分别为3-吲哚甲酸(3-indole carboxaldehyde, 7),3-吲哚甲酸(3-indole carboxylic acid, 8),4-甲基-(1,2,3)-三唑-9-尿嘧啶(uracil, 10),茶酰胺(nicotinamide, 11),(2S,E)-N-阿魏酰胺((2S,E)-N- ferulamide, 12);5个其他类成分,(+)-去氢催吐芦荟素(13),正三十一烷(hentriacontane, 14), β -谷甾醇(β -sitosterol, 15),棕榈酸(palmitic acid, 16),胡萝卜苷(daucosterol, 17)。结论:所有化合物均为首次从该属植物中分离得到。

Chemical constituents of *Pilea cavaleriei* subsp. *cavaleriei*

Abstract:Objective: To investigate chemical constituents from folk herb *Pilea cavaleriei* subsp. *cavaleriei*. Method: The compounds were separated and purified by silica gel, Sephadex LH-20 and the like. The structures were identified by spectral methods such as ¹H-¹³C-NMR and MS. Result: Seventeen compounds were isolated and identified as benzoic acid(1), 4-hydroxy benzaldehyde(2), coumaric acid(3), protoocatechic acid(4), gallic acid(5), 4-hydroxy benzoic acid(6), 3-indole carboxaldehyde(7), 3-indole carboxylic acid(8), 4-methyl-(1,2,3)-triazole(9), uracil(10), nicotinamide(11), (2S,E)-N-阿魏酰胺((2S,E)-N- ferulamide, 12);5个其他类成分,(+)-去氢催吐芦荟素(13),正三十一烷(hentriacontane, 14), β -谷甾醇(β -sitosterol, 15),棕榈酸(palmitic acid, 16),胡萝卜苷(daucosterol, 17). Conclusion: All compounds were obtained from the genus for the first time.
