## **Entrepreneurial Functionality Of New Venture Creation Learners**

Philna Buys, Klaas Havenga

## **Abstract**

The primary objective of this study was to evaluate the suitability of individuals as potential entrepreneurs in the entrepreneurial economic environment. The scientifically validated Functional Intelligence Assessment Tool (FIAT) was applied to nineteen individuals (learners) during their training (New Venture Creation Learnership or NVC Learnership) which was managed by the Services Sector Education and Training Authority (SETA). Only three of the nineteen respondents were found to be suitable as entrepreneurs of whom two also displayed leadership qualities. The implications of the findings are discussed.
